

Root Cause Analysis

Points possible: 50

Category	Criteria	% of Grade
Critical Thinking	Student identifies difficulties and blockers met during the week's project and shows an understanding of why they occurred. Student exhibits problem solving skills by following the problem to the root cause and identifying solutions to overcome the problem.	34
Citations	Student references sources used to overcome the issues outlined.	33
Organization	Thoughts are concise and clear.	33

Instructions: Identify difficulties, errors, or mistakes made this week. Ponder and research the root cause for these issues. Write what you learned from them. Push this document to your GitHub repository for this week. Add the URL for this week's repository to this document where instructed and submit this document to your instructor when complete.

Difficulties, Errors, or Mistakes:

Starting this final project was my main issue.

Root Cause:

Fear of failing.

What did you learn from these issues?

As this is the last assignment and an individual one, I felt more pressure than the other assignments when getting started. After getting my layout put together, I realized I think I am doing okay and this will probably go better than I thought it would. I am actually now a bit excited about getting the rest of it put together in the next couple of weeks.
